

Monsanto Grower Licensing GROWER UPDATE

Monsanto Company has engaged the AgCelerate stewardship electronic registration platform. Register with AgCelerate to update and manage your Monsanto Technology/ Stewardship Agreement (MTSA) and connect with your seed suppliers.

AgCelerate can provide a “One Stop Shop” to view your license status with Monsanto, as well as other trait providers. It also allows you to share that information with your seed supplier(s) of choice.

GROWERS WITH EXISTING MONSANTO LICENSES After completing the one-time AgCelerate registration, if you have a current approved (2010 or later) MTSA, you can login, verify and update your grower information. While in the site, you can also share this information with your seed supplier(s) if you choose to do so.

NEW GROWERS After completing a one-time registration, new Monsanto growers can complete your MTSA electronically – and share your license information with your seed supplier – simplifying the seed purchase process. You can also login to AgCelerate at any time and download a copy of your signed agreement, view your license status or update your information.

FLEXIBILITY Many growers have license agreements with multiple trait providers. The AgCelerate system allows you to manage these multiple agreements. It also allows you to share your license status with the seed suppliers you choose.

IMPORTANT: If you have a current approved (2010 or later) MTSA, you are encouraged to sign the 2015 MTSA in AgCelerate, allowing you to view the current terms and conditions and save the information electronically.

AgCelerate:

- Is easy to sign up for and use.
- Reduces paperwork.
- Provides a simple way to complete licensing agreements across multiple trait providers.

AgCelerate gives you more time to manage your farm operations with fewer burdens of administrative paperwork.
